OUR COMPANY

A STRONG REALITY

Poloplast è oggi una solida realtà nella produzione di packaging per alimenti, con una gamma che conta oltre 230 linee di articoli, specializzata nel settore della gelateria, della pasticceria e del catering. Nata nel 1994 è in costante evoluzione in un'ottica di innovazione e sostenibilità, con un processo industriale sempre più efficiente e sicuro, riducendone l'impronta ecologica.

Poloplast is a strong reality in the foodstuff packaging industry, with a range counting more than 230 product lines, specialized in ice cream, pastry and catering sectors. Founded in 1994, it is constantly evolving with a view to innovation and sustainability, with an increasingly efficient and safe industrial process, and reducing its ecological impact.

Processo di programmazione per il reparto produttivo

Processo di produzione di termoformatura

Processo di produzione ad iniezione

Poloplast dal 2012 è attenta alle più stringenti direttive europee e si sottopone costantemente a certificazioni in merito a sicurezza alimentare. Poloplast, inoltre, è la prima azienda produttrice di packaging Made in Italy per alimenti ad aver conseguito entrambe le certificazioni BRC PACKAGING - GRADE AA e ISO9001:2015.

Poloplast since 2012 is attentive to the most stringent European directives and is constantly subjected to certifications regarding food safety. Poloplast is also the first manufacturer of Made in Italy packaging for food to have achieved both BRC PACKAGING - GRADE AA and ISO9001: 2015 certifications.

PRODUCTION PROCESS & PACKAGING

Da sempre l'azienda ha investito in nuove tecnologie per aumentare la capacità produttiva, l'efficienza, la qualità dei prodotti e la velocità di produzione. La nostra ampia gamma di prodotti e servizi include metodi di produzione e di personalizzazione dei prodotti, dall'iniezione alla termoformatura, fino alla personalizzazione stampa. Questo significa che, in qualità di tuo partner commerciale, possiamo implementare una combinazione di tecnologie diverse e fornirti sempre una soluzione affidabile, con oltre 25 anni di esperienza nello stampaggio, possiamo trovare soluzioni perfette per il tuo packaging su misura.

Poloplast has always invested in new technologies to increase production capacity, efficiency, product quality and production speed. Our wide range of products and services includes methods of production and personalization of the products, from injection to thermoforming, up to print personalization. This means that, as your commercial partner, we can implement a combination of different technologies and always provide you with a reliable solution, with over 25 years of molding experience; we can find perfect solutions for your customized packaging.

Lo sviluppo, la produzione e personalizzazione di soluzioni di packaging innovative ed efficienti costituisce il fulcro delle competenze di Poloplast. Con oltre 12.000.000 di pezzi prodotti ogni giorno esclusivamente in Italia, Poloplast è uno dei maggiori leader di questo settore. Supporto al cliente, innovazione ed esperienza nel settore fanno di noi il partner da scegliere.

The development, production and customization of innovative and efficient packaging solutions are at the heart of Poloplast's expertise. With over 12,000,000 pieces produced every day exclusively in Italy, Poloplast is one of the leaders in this sector. Customer support, innovation and industry experience make us the best partner to choose.

GREEN SHELF SALES

RIUTILIZZARE REUSE

Massimizziamo l'utilizzo di materie prime provenienti da fonti sostenibili.

We maximize the use of raw materials from sustainable sources.

INNOVARE INNOVATE

Ci impegnamo costantemente per la lotta allo spreco, innovando costantemente prodotti, processi e servizi.

We are constantly committed to fighting waste, innovating products, processes and services.

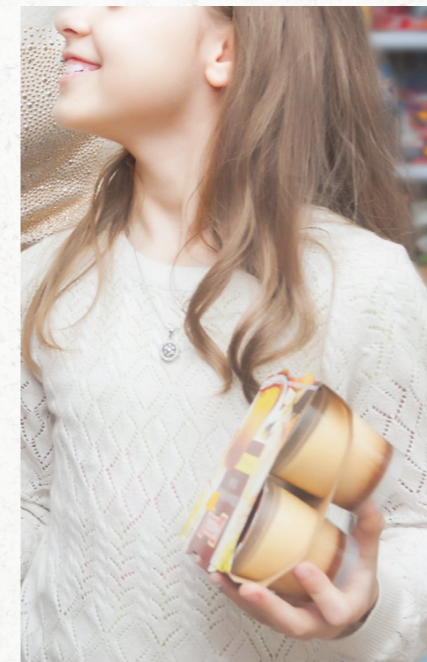

EDUCARE EDUCATE

Supportiamo e promuoviamo continuamente l'utente sull'importanza del riciclo.

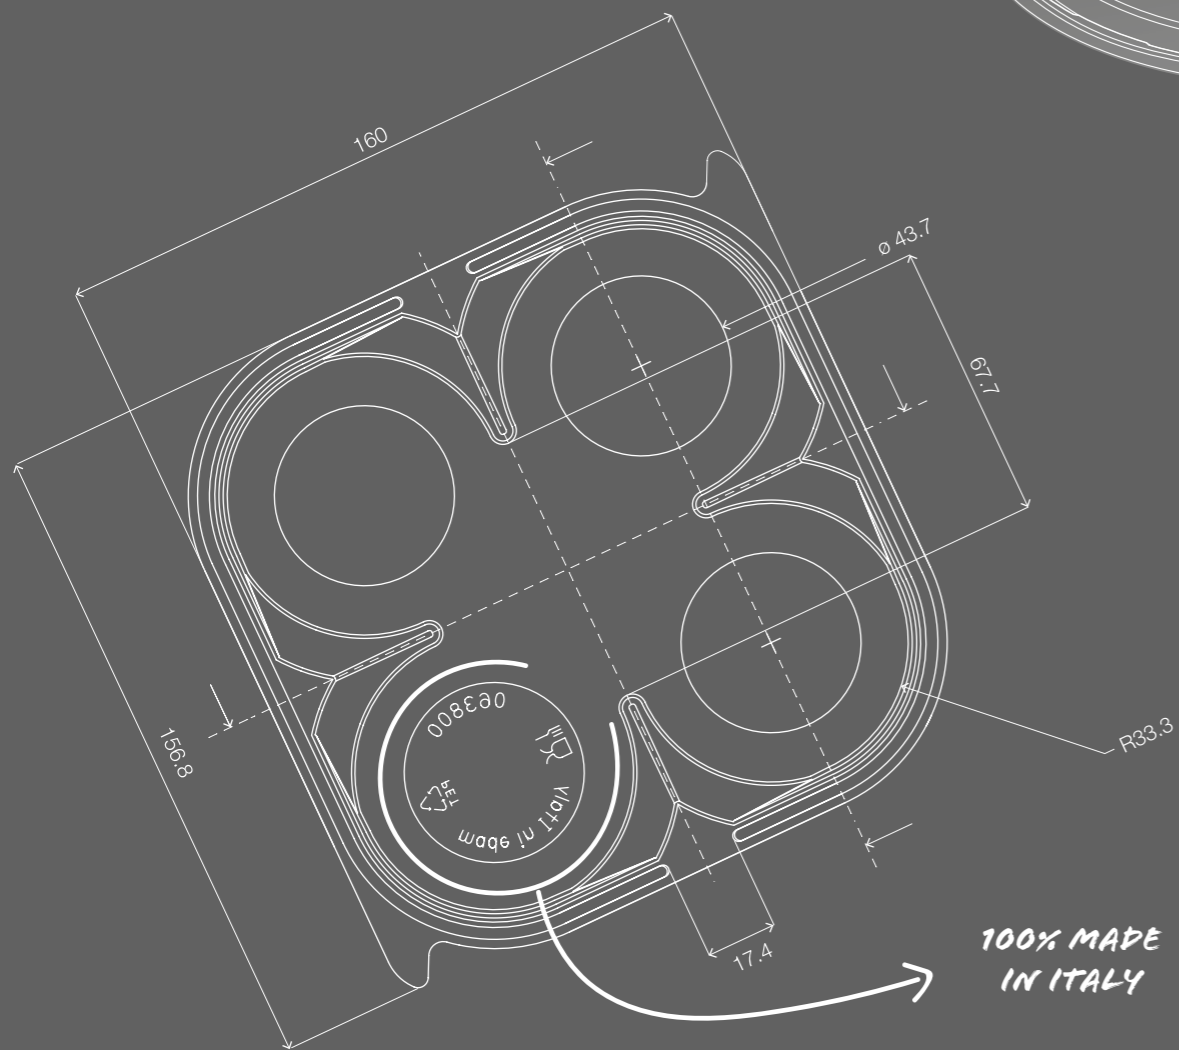

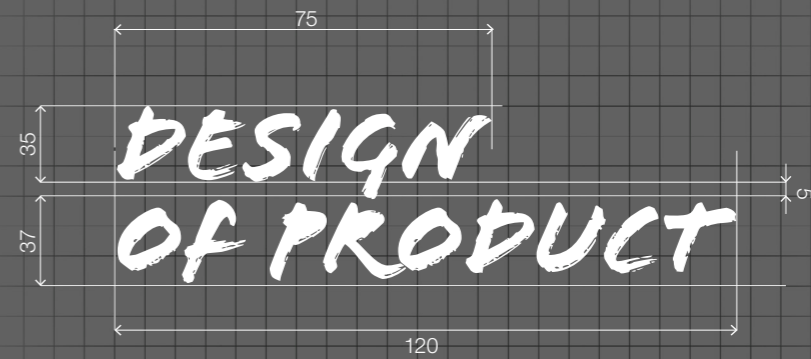

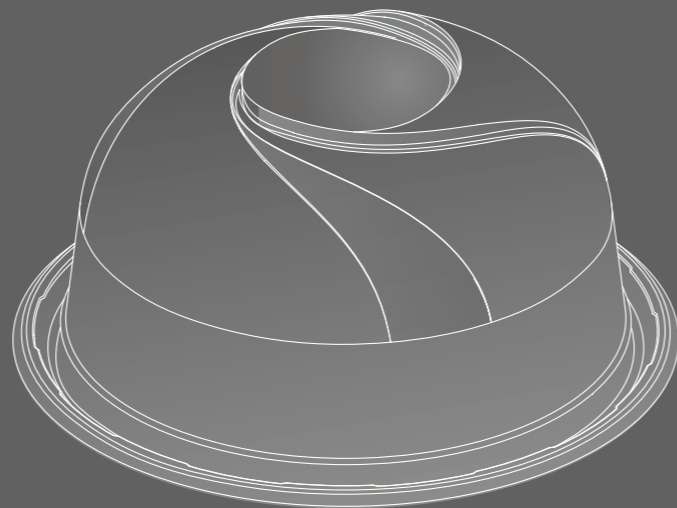

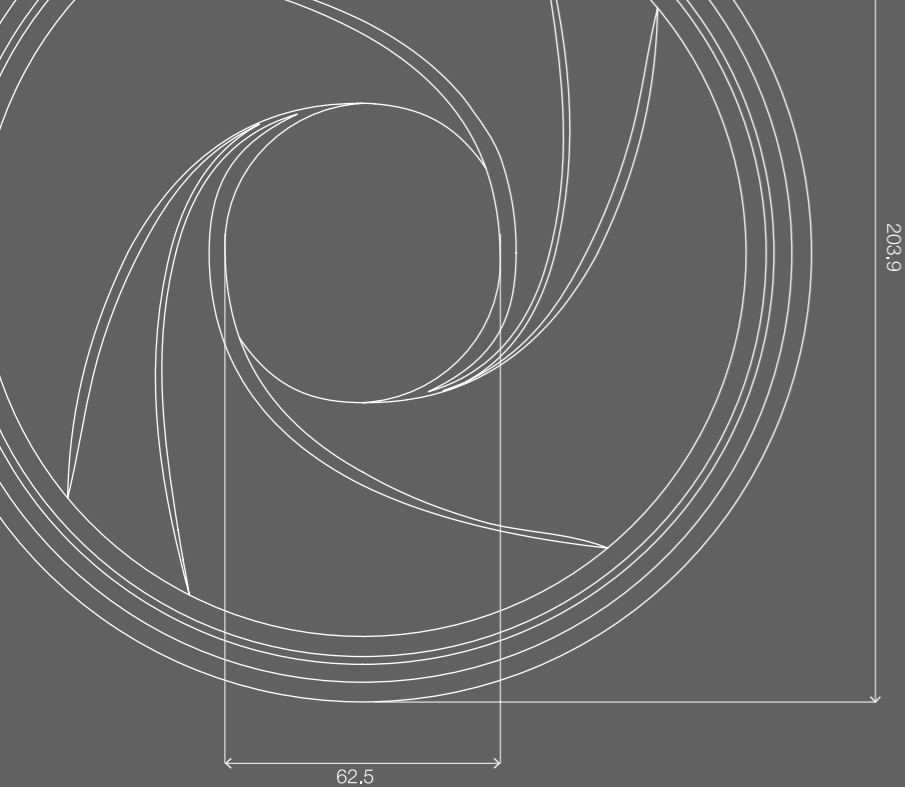

We continuously support and promote the user on the importance of recycling.

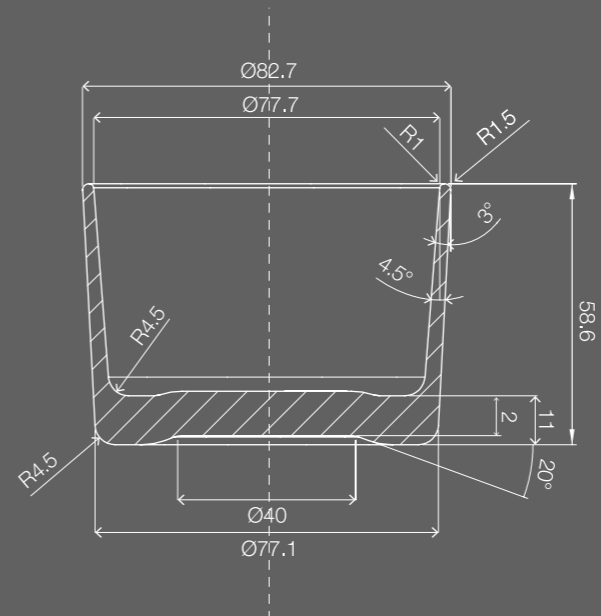

La sostenibilità e la riduzione dell'impatto sull'ambiente sono da sempre le linee guida di Poloplast, non a parole ma con i fatti, utilizzando plastica 100% riciclabile, materiali biodegradabili e compostabili e macchinari ad elevato risparmio energetico. Innovare e preservare l'ambiente, perché il futuro è oggi.

Sustainability and reducing our impact on the environment have always been Poloplast's guidelines, not with words but with facts. We use 100%-recyclable plastic, biodegradable and compostable materials and energy-saving machines. Innovating and preserving the environment, because the future is today.

100% MADE
IN ITALY

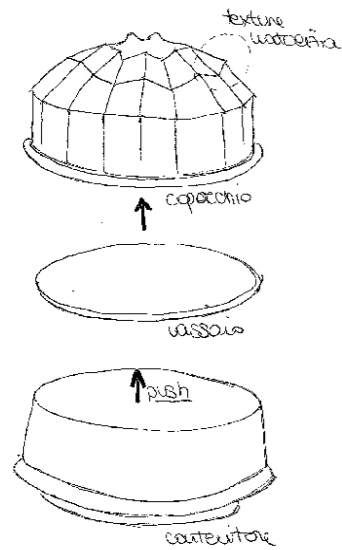

PARTNER IN YOUR CUSTOM

1. BRIEFING

Progettare e produrre nuove soluzioni di packaging vincenti sono procedure molto complesse, perciò nel primo incontro definiamo assieme al cliente le sue necessità, finalità ed eventuali parametri.

To design and develop a new packaging solution is not easy. The first step is to define all customer's needs, parameters and final use.

2. ADVICE

Il nostro team si immerge nel processo creativo analizzando i prodotti dei competitor, validando le proposte e presentando un primo concept su misura per il cliente. Dopo aver presentato le nostre idee al cliente, discutiamo un'ampia gamma di aspetti nel dettaglio: protezione del prodotto, vita sullo scaffale, sostenibilità, requisiti legali, processi automatizzati di confezionamento e logistica, costi e molto altro ancora.

OBIETTIVI:

Presentazione del primo concept	Sottoporre le varie possibilità tecniche	Definire la tecnologia
---------------------------------	--	------------------------

Our creative team studies the products of our competitors, takes into consideration the different options and prepares a first custom-made concept.

After showing our ideas to the customer, we discuss about further details: product protection, shelf life, sustainability, legal requirements, robotised packing processes, logistics, costs and much more.

TARGETS:

Presentation of the first concept	Discussion about the different technical possibilities	Definition of the technology
-----------------------------------	--	------------------------------

3. 3D MODEL

Utilizziamo i più aggiornati software CAD per garantire i più elevati standard fin dall'inizio. Su richiesta del cliente possiamo creare dei prototipi tridimensionali per avere un'idea chiara del prodotto finito.

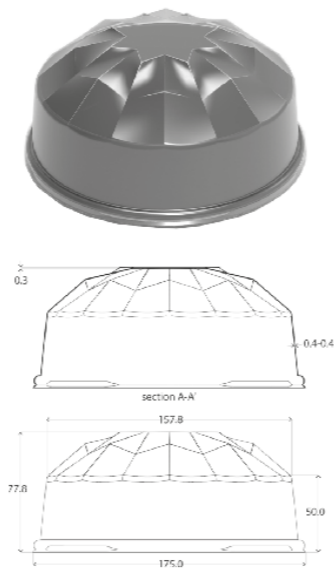

OBIETTIVI:

Rendering 3D	Approvazione design	Analisi costi-benefici	Prototipazione rapida	Presentazione modello 3D
--------------	---------------------	------------------------	-----------------------	--------------------------

With the use of modern Cad software, we can achieve high standard levels from the beginning of the project. If requested from the customer we can realize three-dimensional prototypes of the product to show the final result.

TARGETS:

3D rendering	Design of approval	Cost-benefit analysis	Rapid prototyping	Presentation of a 3D model
--------------	--------------------	-----------------------	-------------------	----------------------------

4. CREATION

Iniziamo il complesso procedimento di creazione dello stampo e accessori per la produzione industriale in serie secondo i più elevati standard.

Mettiamo all'opera la nostra ventennale esperienza nella produzione in serie di packaging per alimenti, monitorando costantemente che il prodotto finito mantenga gli standard di qualità approvati dal cliente.

We start with the complex realization of the mould and further components for the industrial large-scale production, according to the highest quality standards. Our twenty-year experience in large-scale manufacturing of food packaging and the regular quality control, guarantees that the final product always maintains the high quality standards approved by the customer.

Assieme ai nostri clienti, creiamo soluzioni di packaging che, sullo scaffale, sono in grado di fare leva sulle emozioni dei consumatori. Un'esperienza di acquisto studiata ad hoc per i tuoi punti vendita.

Together with our customers, we create packaging solutions that, on the shelf, are able to inspire the emotions of consumers. A shopping experience designed specifically for your stores.

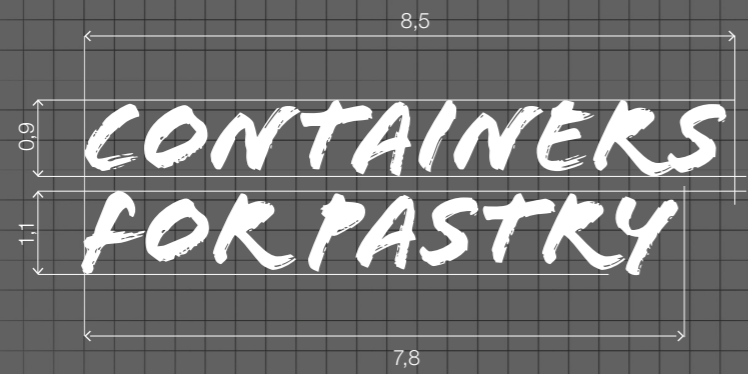

5. CUSTOM

Siamo il partner di fiducia delle principali marche della grande distribuzione organizzata italiana ed internazionale, una relazione leale che risponde prontamente alle vostre richieste con lo sviluppo e l'introduzione di nuovi prodotti sempre più vicini al consumatore. Versatili ma senza perdere di vista il nostro obiettivo imprescindibile: la soddisfazione delle esigenze dei clienti. La nostra esperienza ci permette di offrire, oltre alla nostra grande flessibilità produttiva interna, anche una vasta gamma di prodotti: più di 2.500 forme, che garantiscono ad ogni nostro cliente il prodotto ideale alle sue esigenze. Come esperti consulenti il nostro successo e quello dei nostri clienti passa proprio attraverso il gradimento espresso dai consumatori ai prodotti che sviluppiamo insieme.

We are the trusted partner of the major brands of the Italian and international large-scale retail trade, a loyal relationship that promptly responds to your requests with the development and introduction of new products that are ever closer to the consumer. Versatile but without losing sight of our essential goal: the satisfaction of customer needs. Our experience allows us to offer a great production flexibility and a wide range of products: more than 2,500 shapes, which guarantee to each of our customers the ideal product for their needs. As expert consultants, our success and that of our customers passes through the satisfaction expressed by consumers to the products we develop together.

425CIN

Innovazione e tendenza con un semplice gesto! Facile da incastrare per la tua produzione, facile da togliere per il tuo cliente. Il coperchio Cin è adatto per cucchiaino Remo e la monoporzione Victoria 210cc.

Innovation and tendency in one click! Easy to assemble for your production and easy to remove for your clients. CIN lid is suitable for Remo spoon and for Victoria 210cc.

Il coperchio 425CIN è stato premiato come una delle soluzioni di packaging più innovative ed ecosostenibili immesse sul mercato in occasione del Bando Conai per la Prevenzione 2018. Il coperchio è frutto del continuo impegno di Polo Plast per l'innovazione e la sostenibilità ambientale delle proprie soluzioni di packaging.

I principali benefici di questa soluzione:

- risparmio di materia prima
- semplificazione del sistema imballo
- ottimizzazione dei processi produttivi
- ottimizzazione della logistica

Item 425CIN lid was awarded as one of the most innovative and environmentally sustainable packaging solutions launched on the market by "Bando Conai per la Prevenzione 2018". The lid is the result of the continuous commitment of Polo Plast for the innovation and environmental sustainability of its packaging solutions.

The main benefits of this solution are:

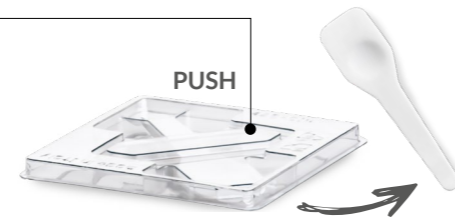

- raw material saving
- simplification of the packaging system
- optimization of production processes
- optimization of logistics

Gourmet, unico coperchio per tre monoporzioni: ideale per l'industria o per un tris di assaggi. Potrete completare il vostro packaging con un'etichetta che faccia da sigillo di garanzia.

Gourmet, one lid for three cups: ideal for industry or for three tastes. You can complete your packaging with a label as seal closure.

Small changes can make a big Difference

COMPOSTABLE

Negli ultimi anni lo sviluppo della chimica verde ha portato sul mercato polimeri biobased, contenenti fonti vegetali rinnovabili, con performance e costi competitivi rispetto ai polimeri tradizionali.

Questi biopolimeri sono formulati in maniera da risultare compostabili, ovvero smaltibili in impianti di compostaggio industriale insieme ai rifiuti organici. È il caso di due materiali che utilizziamo per produrre i nostri articoli compostabili.

Tutta la gamma di prodotti compostabili Poloplast mantiene intatte le caratteristiche di rigidità, è idonea al contatto alimentare ai sensi del Regolamento UE n. 10/2011 (e successive modifiche) e rispetta le direttive della norma UNI EN13432 in materia di compostabilità.

Il compost ottenuto dallo smaltimento di questi articoli fertilizzerà il terreno su cui poi nasceranno altre piante dalle quali si otterranno nuovamente materie prime. Un circolo virtuoso che comporta meno impiego di risorse non rinnovabili, meno energia e meno CO₂.

Al fine di mantenerne intatte le caratteristiche, gli articoli compostabili devono essere stoccati in ambiente fresco e asciutto, lontano da fonti di luce e di calore.

In recent years the development of green chemistry has brought to the market bio-based polymers, containing renewable plant sources, with competitive performance and costs compared to traditional polymers.

These biopolymers are compostable, and should be disposed in industrial composting plants together with organic waste. This is the case of two materials we use to produce our compostable articles.

The whole range of Poloplast compostable products keeps intact the characteristics of rigidity, it is suitable for food contact according to EU Regulation n. 10/2011 (and subsequent amendments) and complies with the directives of the UNI EN13432 standard on compostability.

The compost obtained from the disposal of these articles will fertilize the soil on which regrow other plants, used to create again raw materials. A virtuous circle that involves less use of non-renewable resources, less energy and less CO₂.

The compostable materials must be stored in a cool and dry environment, away from sources of light and heat.

Ri-
spetta
l'ambiente
con i nostri cuc-
chiaini compostabili!
Disponibili in varie mi-
sure e nelle nuove nuance
pastello, daranno il giusto
tocco di originalità ai tuoi pro-
dotti.
Respect the environment with
our compostable spoons! Avail-
able in different sizes and in
new pastel colors, they will
give a touch of originality
to your products.

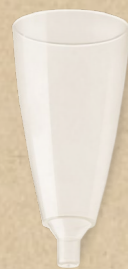

DESSERT AL BICCHIERE & CO.

Tutto il gusto delle tue specialità... rispettando l'ambiente. Dopo il loro utilizzo, grazie alla raccolta differenziata, gli articoli compostabili presenti in questo catalogo verranno portati in siti di compostaggio industriale e dopo un processo di degradazione torneranno ad essere Humus che migliorerà la struttura del suolo.

All the taste of your specialties ... respecting the environment. After their use, thanks to the differentiated collection, the compostable articles present in this catalogue will be brought to industrial composting sites and after a degradation process, they will return to being Humus which will improve the soil structure.
